HIGH CURRENT HIGH POWER DC LOAD

POSITIVE PROBLEM SOLVING **+ =**

With a high power capability and wide current range this feature laden series of electronic loads are suitable for many applications.

When working with a DC source that requires low currents to be sunk the load's dual ranges allow for high degree of resolution and accuracy. Constant current, resistance, voltage and power modes are all provided as standard. When operated in CC or CP modes the loads provide true dynamic functionality. This enables real world pulsing loads to be accurately simulated. Dual ranges are provided for the current rise and fall times.

- + CC, CR, CV, CP, Dynamic & Short Mode**
- + OCP, OPP & Short Test Functions**
- + IEEE488.2 & RS-232 Interfaces**
- + Scope Output for Load Current**

ELP-33500F

HIGH CURRENT HIGH POWER DC LOAD

FURTHER DETAILS

Slew rates as slow as 16mA per microsecond can be set on some models while others allow fast changes of up to 30A per microsecond to be programmed.

A BNC connector is provided on the rear panel to allow the load to follow an external signal such as that created by a waveform generator. An isolated BNC connector is also provided on the front panel to monitor the actual load current.

Front panel control and display along with RS-232C and GPIB interfaces are provided for remote control and measurement. To simplify test procedures all units have 150 sets store/ recall memory. The simultaneous display of V, I & W values provides real time monitoring of UUT.
